Horizon Europe - Work Programme 2023-2025
Widening participation and strengthening the European Research Area

<i>project</i>	Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 2.50 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Eligibility conditions</i>	The conditions are described in General Annex B. The following exceptions apply: Legal entities established in non-associated third countries may exceptionally participate in this Coordination and support action. Due to the scope of this topic, legal entities established in non-associated third countries are exceptionally eligible for Union funding.

Expected Outcome: Projects are expected to contribute to the following expected outcomes:

- Enhanced understanding of the different non-for-profit open access publishing solutions, their business models and sustainability;
- Coordination amongst institutional not-for-profit open access publishing services between Europe and other areas in the world at the non-technological level leading to high-quality publishing services and publishing venues at the global scale that are trusted by researchers;
- Enhance the uptake of elements of open science by open access publishing services in Europe and other areas of the world (e.g., open peer review, early sharing of research, post-publication peer review models etc.);
- Fit for purpose training materials and trainings for service providers and scientific journal editors in different disciplines enabling the improvement of the quality of publishing services and of the scientific quality of publishing venues along internationally accepted standards.

These targeted outcomes in turn contribute to medium and long-term impacts:

- Increased equity, diversity and inclusivity of open science practices, and in particular open access publishing on a not-for-profit basis, in the European Union and in the world;
- Structured mechanisms for knowledge transfer between relevant not-for-profit open access publishing services in the European Union and other areas of the world.

Scope: A significant increase in open access publishing activities based on not-for-profit business models can be observed in Europe and across the world, which in principle do not charge authors for publishing. They are the result of technological advancements leading to shifting roles of actors involved in scholarly communication. Their offering is presented as an alternative to commercially oriented publishing, or is a continuation of long-term traditions of institutional and mission-oriented publishing in a new digitally enabled context.
