

Translating Italian University Strategies into Funding Opportunities

AI-POWERED RECOMMENDATION SYSTEM

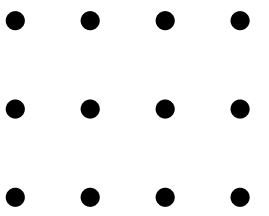

AI Techniques

Case Presentation for EY

Filippa Grönberg · Luka Burmazevic · Evelina Ristovska

PNRR · EU Horizon Europe · Universities

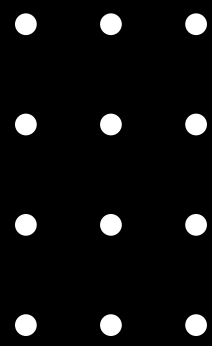

The problem

- **100+ pages**, every strategic plan is a dense Italian document. It takes time to reference it manually with dozens of calls.
 - **Weeks of expert work**, if matching is done by hand, and it's still often wrong or incomplete.
 - **Millions in missed fun**. Universities apply to the wrong calls or miss deadlines because the discovery process is often too slow.
- 

The solution

- **Automation**: Our pipeline reads the full strategic plan returning ranked recommendations
 - **Multilingual AI** handles both languages Strategic plans are in Italian, calls are in English.
 - **Top-3 ranked** calls with explanations, ready to act on every recommendation
- 
- 

How It Works

There are three Steps. One Briefing

- **Upload** your university's strategic plan PDF
- **Analyse**, the AI reads it, searches across all funding calls, and ranks the best matches
- **Receive** a ready-to-use briefing with matched themes, gaps, and citations

Summary

Executive Briefing

The Naples Strategy focuses on digital transformation, AI-enabled education, and sustainability. It prioritizes skills education and governance reforms, while aligning with climate and innovation goals.

Confidence: Medium

Top 3 Calls

1. PRIN 2022 PNRR.pdf

SP emphasizes skills education and AI-enabled teaching modernization. The call supports AI/data capability building and university-industry transfer activities. Therefore this call is a medium-to-strong fit because its funded actions directly map to the SP's AI and skills priorities, though governance deliverables are less explicit in the SP.

Call confidence: Medium

Citations:

- PRIN 2022 PNRR.pdf (page 17)
- PRIN 2022 PNRR.pdf (page 2)

2. PRIN PNRR 2022 NextGen.pdf

The call supports AI/data digital innovation and international collaboration. The SP's focus on AI enables alignment with the call's requirements, making it a medium-to-strong fit. However, the SP's current governance framework lacks clarity on implementation.

Call confidence: Medium
