

Horizon Europe - Work Programme 2021-2022
Widening participation and strengthening the European Research Area

<i>contribution per project</i>	2.00 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 2.00 million.
<i>Type of Action</i>	Coordination and Support Actions
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply: Beneficiaries may provide financial support to third parties. The support to third parties can only be provided in the form of grants. The maximum amount to be granted to each third party is EUR 60 000.

Expected Outcome: Projects are expected to contribute to the following expected outcomes:

- Increased participation of research performers in standardisation activities
- Increased development of new standards or revision of existing standards to reply to new industrial and market conditions through contribution of EU research performers
- Increased uptake of new technologies resulting from boosting standardisation activities

Scope: The Standardisation Booster will help beneficiaries, whose H2020 and Horizon Europe research results appear likely to lead to the revision or creation of a standard, to test the relevance of their results for standardisation activities. This booster will be open for on-going and closed H2020 and Horizon Europe projects. This service will help these beneficiaries to engage with standardisation bodies and contribute to the preparation and elaboration of standardisation activities, such as participating in a focus group, setting up a new technical committee, drafting a technical specification or a technical report, participating in awareness events.

The Standardisation Booster will serve as a standardisation proof of concept scheme. The consortium will manage the scheme and should be able to engage with high-level independent experts in standardization in order to assess the standardization potential of research results. The consortium will select H2020 or Horizon Europe projects with a high likelihood of leading to the preparation and elaboration of standardisation activities, while ensuring geographical and gender balance.

HORIZON-WIDERA-2021-ERA-01-33: R&I intensive IP management: Scenarios for the future

Specific conditions	
<i>Expected EU contribution per</i>	The Commission estimates that an EU contribution of around EUR 1.00 million would allow these outcomes to be addressed appropriately.
