

countries. The action will support the development of training materials and training programmes, the mutual learning and exchange of practices and tools, and awareness raising, for researchers, reviewers and research organisations. The action will also put in place mechanisms to monitor the effects of policies and practices implemented, thus enabling future adaptations based on evidence gathered. In order to better achieve the expected outcomes, international cooperation is encouraged, in particular with third countries that are active in the development of policies and initiatives to increase the reproducibility of research results.

The action should build on the research results and recommendations from projects selected under call topic HORIZON-WIDERA-2022-ERA-01-41 that aims at understanding the underlying drivers of reproducibility and recommending effective interventions, as well as from other relevant projects and initiatives.

GENDER

With Horizon Europe, the Commission reaffirms its commitment to gender equality in research and innovation. The aim is to improve the European research and innovation system, create gender-equal working environments where all talents can thrive and better integrate the gender dimension in projects to improve research quality as well as the relevance to society of the knowledge, technologies and innovations produced.

Proposals are invited against the following topic(s):

HORIZON-WIDERA-2024-ERA-01-10: Policy coordination to support all aspects of inclusive Gender Equality Plans and policies in the ERA

Specific conditions	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of around EUR 3.50 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 3.50 million.
<i>Type of Action</i>	Coordination and Support Actions

Expected Outcome: Projects are expected to contribute to the following outcomes:

- Advanced and sustainable policy coordination support on ERA objectives on gender equality and inclusiveness among Member States and Associated Countries and through stakeholder and citizen engagement;
- Improved career paths and working conditions in European research and innovation organisations, including in the private sector, through enhanced policy dialogue on inclusive gender equality plans and policies;

- Increased research quality and societal responsibility and relevance of knowledge and innovations, through the integration of the gender and intersectional dimension in research and innovation content;
- Increased geographical inclusiveness by targeting less experienced countries and regions in terms of inclusive gender equality policies in research and innovation;
- Increased inclusion of underrepresented and socially disadvantaged persons in European research and innovation, through an intersectional lens on gender equality plans and policies.

Scope: As the new package adopted on 26 November 2021 on the European Research Area (ERA) framework¹¹⁸ reaffirms, there is a need for policy coordination to advance the implementation of the ERA gender equality and inclusiveness objectives within Member States, Associated Countries and among other ERA stakeholders, building on the commitment expressed through the Ljubljana Declaration on gender equality in research and innovation¹¹⁹.

Ensuring the active promotion of gender equality and inclusiveness entails opening up gender equality policies in R&I to diversity, and more specifically to: social categories and grounds for discrimination intersecting with gender, such as ethnicity, disability, sexual orientation or socio-economic status; ensuring geographical inclusiveness; and opening to the innovation and private sector. This new inclusive approach to gender equality is also embedded in the new European Commission Gender Equality Strategy 2020-2025.

This action focuses on the development of a sustainable network of national representatives from all EU Member States and Associated Countries, both from national bodies (e.g., ministries) and from national research funding organisations, to support the implementation of the gender equality and inclusiveness objectives of the ERA. It should build on related actions funded through Horizon Europe call topics HORIZON-WIDERA-2021-ERA-01-81, HORIZON-WIDERA-2021-ERA-01-80, HORIZON-WIDERA-2022-ERA-01-80 and HORIZON-WIDERA-2022-ERA-01-81, the European Gender Equality Competence Facility funded under the 2022 WIDERA work programme, as well as on projects funded under the Horizon 2020 Science with and for Society (SwafS) programme.

During its lifetime, the action should:

- Develop knowledge and build capacities, competences and expertise on the design, implementation, monitoring and evaluation of inclusive gender equality plans and policies in R&I with a variety of European and national stakeholders. Special consideration will be given to mutual learning exercises to enhance the competence of national gender equality representatives, including helping less experienced national gender equality representatives to acquire expertise;
